

Syllabus		
Course Information	CS 551: Computer Graphics	
Instructor	Please refer to your online course: <u>https://mymasonportal.gmu.edu/</u>	
Course Description	Basic graphics principles, and programming. Topics include scan-conversion, transformation, viewing, lighting, shading, ray-tracing, blending, texture mapping, and some advanced graphics techniques.	
Course Objectives	Upon completion of the course, students will be able to:	
	 Implement OpenGL programs using JAVA/JOGL. Apply trigonometry, geometry, vector analysis, and linear algebra to solve real world problems in graphics. Utilize transformation and viewing for 3D animation. Utilize GPU shaders for vertex and fragment lighting. Describe some advanced graphics capabilities, including raytracing, blending, texture mapping, bump mapping, displacement mapping, geometry shader, and shadows. 	
Course Methodology	The class format will combine reading, lectures, presentations, and other learning tools online in Blackboard. The class will be interactive and require every student to be engaged in discussions and assignments. In addition to the lectures, screencasts, and timely completion of assignments, every student will be expected to be an active participant and a dedicated individual applying what you learn to every element of the course work.	
Required textbook(s) and/or materials	Required Text: V. Scott Gordon and John L. Clevenger, Computer Graphics Programming in Open GL with Java, January 2017, or latest. Jim X. Chen and Chunyang Chen, Foundation of 3D Graphics Programming Using JOGL and Java3D, Second Edition, Springer Verlag.	
Computer Requirements	Hardware: You will need access to a Windows computer with at least 2 GB of RAM and access to a fast and reliable broadband internet connection (e.g., cable, DSL). A larger screen is recommended for better visibility of course material.	

Course Website	Blackboard will be used for this course. You can access the site at http://mymasonportal.gmu.edu. Login and click on the "Courses" tab. You will see CS 551 course (NOTE: Username and passwords are the same as your Mason email account). You must have consistent access to an internet connection in order to complete the assignments in this course through Blackboard (http://mymason.gmu.edu).
Participation	Learning can only happen when you are playing an active role. It is important to place more emphasis on developing your insights and skills, rather than transmitting information. Knowledge is more important than facts and definitions. It is a way of looking at the world, an ability to interpret and organize future information. An active learning approach will more likely result in long-term retention and better understanding because you make the content of what you are learning concrete and real in your mind.
	Although an active role can look differently for various individuals, it is expected in this class that you will work to explore issues and ideas under the guidance of the professor and your peers. You can do this by reflecting on the content and activities of this course, asking questions, striving for answers, presenting your solutions, interpreting observations, and discussing issues with your peers.
Rules and Expectations	 In correspondence/communication students will be expected to: a) Be professional and respectful in correspondence b) Make reasonable requests of the instructor. We will be happy to clarify course material and answer legitimate questions; however, please exhaust other information sources (e.g., syllabus, Blackboard) for answering your question before contacting your instructor and remember, "Poor planning on your part does not constitute an emergency on my part."
	 Regarding honesty in work, students will be expected to: a) Review the University integrity and honesty policies in the student handbook for guidelines regarding plagiarism and cheating (summarized below). I will gladly clarify my stance on any questionable or "grey area" issues you may have. b) Refrain from dishonest work as it will receive a minimum penalty of zero on the assignment and a maximum penalty of a zero for the course with a report to the Honor committee. The GMU Honor Code requires that faculty submit any suspected Honor Code violations to the Honor Committee. Therefore, any suspected offense will be submitted for adjudication.
Mason Honor Code	The complete Honor Code is as follows: To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of the George Mason University community and with the desire for greater academic and personal achievement, we, the student members of the university community, have set forth this honor code: Student members of the George Mason University community pledge not to cheat, plagiarize, steal, or lie in matters related to academic work.
	(From the Catalog – catalog.gmu.edu)

Cheating Policy	
Cheating Policy	Any form of cheating on an activity, project, or exam will result in zero points earned.
	"Cheating" includes, but is not limited to, the following: reviewing others'
	exam papers, having ANY resources utilized when not allowed,
	collaborating with another student during an individual assignment.
	If you have questions about when the contributions of others to your work
	must be acknowledged and appropriate ways to cite those contributions,
	please talk with the professor or utilize the GMU writing center.
Plagiarism and the	Copyright rules also apply to users of the Internet who cite from Internet
Internet	sources. Information and graphics accessed electronically must also be
	cited, giving credit to the sources.
	This material includes but is not limited to e-mail (don't cite or forward
	someone else's e-mail without permission), newsgroup material, information
	from Web sites, including graphics. Even if you give credit, you must get
	permission from the original source to put any graphic that you did not
	create on your web page. Shareware graphics are not free. Freeware clipart
	is available for you to freely use. If the material does not say "free," assume
	it is not.
	Putting someone else's Internet material on your web page is stealing
	intellectual property. Making links to a site is, at this time, okay, but getting
	permission is strongly advised, since many Web sites have their own
	requirements for linking to their material. Review the Honor Code here.
Individuals with	Students with documented disabilities should contact the Office of Disability
Disabilities	Services (703) 993-2474) to learn more about accommodations that may be
	available to them.
	(From the 2019-2020 Catalog – catalog.gmu.edu)
Academic Integrity	This course embodies the perspective that we all have differing perspectives
and Inclusivity	and ideas and we each deserve the opportunity to share our thoughts.
	Therefore, we will conduct our discussions with respect for those differences. That means, we each have the freedom to express our ideas, but we should
	also do so keeping in mind that our colleagues deserve to hear differing
	also do so keeping in mind that our colleagues deserve to hear differing thoughts in a respectful manner, i.e. we may disagree without being

Course Grading &	There are all together 100 points:	
Evaluation	Homework assignments (20 points)	
	 Quizzes and exercises (20 points) 	
	One programming project (20 points) A Final Exam (25 points)	
	A Final Exam (35 points)	
	Discussion participations (5 points)	
	• Your overall course score, S, will be the sum of these points.	
	A: S is at least 90 points	
	B: S is at least 75 points	
	C: S is at least 60 points	
	F: S is fewer than 60 points	
	Each assignment/project late may not be accepted. Therefore, you should	
	plan on working early. If there is an accident or emergency and you let me know, I will consider it accordingly.	
Discussions-	You are strongly recommended to post your results with images or	
	animations. Your challenge is to immerse yourself in the topics and	
	perspectives presented in the course. You will want to be able to comment	
	on the discussion topics with authority. You are encouraged to make notes	
	on your own thoughts about the various concepts and issues, and consider	
	possible issues/outcomes. Your questions should be to the point and	
	include sufficient technical detail for others to respond. You should present	
	your opinions but justify them with facts and proper sources. What did you	
	disagree with and why, or not understand? Again, you can present images	
	or animations of your work for questions or comments.	
	Initial/Original Post	
	Please provide response with a clear, well-formulated thesis; sentence	
	structure, grammar, punctuation, and spelling count. Support all posts with	
	appropriate rationale and citations from readings; appropriately document	
	sources.	
	Responding to Others	
	Responses to classmates' postings should be thoughtful, and substantial.	
	Consider points of agreement, disagreement, assumptions, and value	
	judgments.	
	Instructions	
	Each student will make at least one original post for the first lesson 3 days	
	before the homework due.	
Assignments and	Each week a programming assignment is required to be uploaded to	
quizzes –	Blackboard. Also, after finishing reviewing, there is a weekly online quiz in	
	Blackboard. Assignments and quizzes are due as stated. Refer to the course	
	schedule and weekly overviews for details.	
Exams –	The Final Exam will be an open-book test online in Blackboard that must be	
	finished in 2 hours or as specified.	
Final Project –	The project will be announced in Blackboard with technical details.	
	Need Help?	
Utilize the "Course Q&A" discussion forum or email your instructor directly.		

Expect to work 15-20 hours per week on the assignment and quiz for this course.

Unless otherwise stated, all assignments and quizzes are due by the end of the following week in which

they are assigned. A week is defined as **beginning at 12:01 am each Monday EST**, and **ending at 11:59 pm on Sunday EST**.
