COMPUTER SCIENCE MINOR
2015 - 2016

Computer Science is a discipline concerned with the analysis, design, implementation, maintenance and evolution of computer-based systems used in almost all walks of life. The Minor in Computer Science is intended for those pursuing other undergraduate degree programs and who feel the need to pursue Computer Science to complement their other studies. Regardless of their discipline, undergraduates find a knowledge of Computer Science to be helpful in today’s world. This minor is not a “computer literacy” program; all the courses are the same ones taken by Computer Science majors.

Students requesting a Computer Science Minor must have completed CS112 or CS211 with a grade of B or better.

This totals 19-20 credits. Students should pay careful attention to prerequisites when selecting courses and be aware that at least 4 semesters are needed to complete the Minor.

University requirements state that at least 6 hours must be completed at George Mason University. No more than 3 hours of “D” in the minor is accepted. University requirements also state that at least 8 hours used towards the minor may not be used towards the student’s major requirements.
