Biography

DR. KENNETH E. NIDIFFER, PMP
Director of Strategic Plans for Government Programs
Software Engineering Institute, Carnegie Mellon University

Dr. Nidiffer has over fifty-six years of experience in the marketing, research, development, support, maintenance, and acquisition of software-intensive systems. His 24-year career in the U.S. Air Force (where he retired as a full colonel) is marked by several firsts in the area of software implementations, such as, first space-based compiler, first command-hardware in the loop simulation, a series of development/process standards, etc. From 1983-1986 he helped establish several noteworthy contributions, such as, the Software Productivity Consortium; the Software Project Management Program at the Defense Systems Management College; the George Mason Software Engineering Program and the Software Engineering Institute. At the Software Productivity Consortium he launched the Consortium’s business initiative in software process improvement, which became one of the largest programs in the world.

In 1991, Dr. Nidiffer left the Consortium to serve one of its founding members, Northrop Grumman, as Director of Systems Design and Development, Data Systems Division, and then as Director of Technical Operations, External Data Systems division, where he directed over 500 engineers and support personnel in the successful development of a variety of C4I, MIS/logistics, and high-speed computing applications.
Biography

In 1995, he joined Fidelity Investments Systems Company as Senior Vice President of Quality and Systems Assurance to lead a team of 165 professionals in implementing Total Quality Management, best-in-class software engineering processes, and the largest financial services test environment. He rejoined the Consortium in 1997 as Vice President for Business Development growing the membership from 50 to 100 members. In 2007 he joined the Software Engineering Institute to focus on promoting key software engineering technologies that support government programs.

Dr. Nidiffer has been widely published in the systems and software engineering community. He received his B.S. degree in Chemical Engineering in 1962 from Purdue University, Indiana, a M.S. degree in Astronautical Engineering in 1969 from the Air Force Institute of Technology, Ohio, a MBA degree from Auburn University, Alabama in 1975 and his D.Sc. degree from George Washington University, Washington D.C. in 1988.

He is a member of the Program Management Institute (PMI); the International Council on Systems Engineering (INCOSE – Corporate Advisory Board (alternate)); the Air Force Association (AFA); Senior Member of the Institute of Electrical and Electronics Engineers (IEEE) and Member of the IEEE Professional and Activities Board (PAB); Senior member of the American Institute of Aeronautics and Astronautics (AIAA); member of the National Defense Industrial Association (NDIA Systems Engineering Division); member of the NDIA/OSD (DDR&E) Industrial Software Committee and a member of the NDIA Systems Engineering Education and Training Committee.
Biography

Ken is a certified logistician; a Professor Emeritus of the Defense Systems Management College; Industry Advisor on George Mason’s Computer Science Education Committee; a Project Management Professional; and an adjunct engineering professor in graduate engineering at George Mason University for over 28 years.

Dr. Nidiffer is a man of faith and a family-oriented person. He has been married for 54 years to the former Mary Emma Walsh of Havana, Florida and they have three daughters: Sheri, Kristi and Kathi and four grandchildren. In 2002 and in 2007, he was selected as the School of Information Technology’s adjunct professor of the year in Software Engineering and received special recognitions for his GMU adjunct teaching service in 2009, 2013 and 2017.

DEPARTMENT OF COMPUTER SCIENCE

COURSE OVERVIEW
SOFTWARE ENGINEERING PROJECT MANAGEMENT 625

• COURSE TITLE: Software Engineering Project Management (SWE 625)
• INSTRUCTOR: Professor Kenneth E. Nidiffer
• SEMESTER CLASSES: Spring 2017 (22 Jan to 07 May, including final exam)
• SEMESTER FINAL EXAM: 07 May 2018, 1930 - 2210 – Innovation Hall, Room 204)*
• CLASS TIME/BLDG/ROOM: 1920 – 2200; Innovation Hall; Room 204

*Note: The student will be provided a reading day to prepare for the final exam during the week of either 23 April or 30 April 2018
COURSE OVERVIEW
SOFTWARE ENGINEERING PROJECT MANAGEMENT 625

• OFFICE HOURS: 1815 - 1900 Mondays
    Room TBD, Nguyen Engineering Building (Academic IV, Research II)

• Meeting Arrangement Mechanisms:
  o By appointment in class
  o By the Internet – nidiffer@sei.cmu.edu – Best alternative
  o By note in my mail box – Suite 4300
  o By setting-up a conference call
  o By setting-up a video-teleconference (VTC)
  o Department Administration Assistant
    • Ms. Michele L. Pieper: 703-993-1530
COURSE OVERVIEW
SOFTWARE ENGINEERING PROJECT MANAGEMENT 625

• CONTACT INFORMATION:
  o Internet/E-mail: nidiffer@sei.cmu.edu (Best Method)
  o Internet/E-mail: knidiffe@gmu.edu (Good Alternative Method)
  o Oral Communication Mechanisms
    • Method 1: (703) 455-4021 (Home Phone Number) - Best Method
    • Method 2: (703) 217-0215 (Cell Phone) or Text – Good Alternative Method
    • Method 3: (703) 247-1387 (Phone-Office Number Emergency Only)
TEXT: Title - Managing and Leading Software Projects
Dated: 2009*
ISBN 987-0-470-29455-0
Author: Dr. Richard E. (Dick) Fairley
Publisher: John Wiley & Sons, Inc.
Options to Obtain:
  1. Can Pick-up at University Bookstore (located in the George W. Johnson Center)
  2. Order on-line
  3. Obtained previously owned book
* Students are expected to study and understand the contents of the course text book
Course Materials

1. Announcements
2. Administrative Notes
3. Presentation (Slides)
4. Student Handouts
5. Student Responses
6. Graded Responses
7. Student Presentation Mat’ls
8. Student Final Responses
9. Class Contributions

* Some presentation slides, document templates and other supporting materials for class test book are also available at the following URL: computer.org/book_extras/fairley_software_projects Please note that additional materials will be presented in class; thus, it is advisable to obtain the slides from the GMU Blackboard Learning Management System web site for this course.
COURSE PREREQUISITES:
Undergraduate courses or equivalent knowledge in structured programming in a high-level language, data structures, discrete mathematics, and machine organization or assembly programming.

COURSE DESCRIPTION:
This course is concerned with processes involved in project planning; organizing; staffing; estimating; measuring and controlling; communication, coordination and leadership; and risk management. Topics covered include lifecycle delivery approaches; process and engineering product development models with special emphasis on the best practices contained in the Capability Maturity Model Integrated (CMMI©) constellations and product standards. The course also stresses the Program Management Institute’s Program Body of Knowledge (PMBOK©) and the Software Engineering Body of Knowledge (SWBOK).
COURSE OBJECTIVES:

Upon completion of this course, students will know how to develop a software project management plan for software intensive systems; how to set up monitoring and control mechanisms; how to allocate and reallocate project resources; how to track schedule, budget, quality, productivity, and progress; understand the CMMI© frameworks and how to plan for the installation and sustainment phase of the system life cycle. They will understand the importance of the work breakdown structure and its relationship to the delivery lifecycle, resource planning and execution, and progress and product measures from both a project and enterprise perspective. In addition, they will understand the relationships among quality assurance, configuration management, verification and validation, and test and evaluation. They will also gain an understanding of the key issues in costing and pricing units of effort, motivation of workers, leading project teams, and total quality management.
MAJOR TOPICS:

A taxonomy of management functions; corporate goals and objectives; system, project and product (functional and non-functional) requirements; architectural frameworks; best practice frameworks, cost estimation techniques and models; software process development models with special emphasis on the CMMI© and software systems engineering delivery models; technical methods; documentation, quality assurance, configuration management, verification and validation, test and evaluation; staffing plans; monitoring and controlling mechanisms; standards (e.g. IEEE/EIA 12207 and IEEE Std. 16326™), policies and acquisition frameworks (i.e. Defense (e.g. DODI 5000.02, Defense Acquisition Guidebook (DAG) and Commercial (e.g. Infrastructure Service Provider (ISP)/Application Server Provider (ASP) frameworks), and procedures; work packages, schedules, budget, accounting systems, costing and pricing units of effort; risk management; post deployment software support; leadership, ethics, team building and total quality.
EVALUATION PROCEDURE:

Grades will be based on student homework, class contributions, student presentation and the final exam in the following proportions:

- Class Contribution (Contributions In Addition to the Six Articles*) 10%
- Homework 10%
- Six Articles* 10%
- Project 15%
- Student Project Presentations** 10%
- Final Exam*** 45%

Note: Final exam is scheduled for 11 Dec, 2017 (7:30 – 10:10 pm)

* Articles are to submitted in class. Students can submit their articles during any class period.
Note: All articles will be accompanied with a one-page analysis of each article. Three articles are to be from refereed sources and three can be from any source.
