SWE 632: User Interface Design and Development, Spring 2018

Tuesday, 4:30pm-7:10pm, 136 Innovation Hall

Grades: Blackboard
Syllabus, Schedule, and Lecture Slides: Website (http://cs.gmu.edu/~tlatoza/teaching/swe632s18/home.html)
Resources (Announcements, Assignments, Discussion): Piazza (https://piazza.com/gmu/spring2018/swe632/home)

Instructor: Prof. Thomas LaToza (http://cs.gmu.edu/~tlatoza)
tlatoza@gmu.edu (https://mail.google.com/mail/?view=cm&fs=1&tf=1&to=tlatoza@gmu.edu)
Office: 4431 Engineering Building; (703) 993-1677
Office Hours: Anytime electronically, Wed 1:30-3:00, or by appointment

Teaching Assistant
Animesh Jain
ajain13@masonlive.gmu.edu
Office: TBA
Office hours: TBA

Course Overview
This course will provide a comprehensive introduction to human-computer interaction and the design and development of user interfaces, covering basic human cognition, methods for needfinding and prototyping, user-centered design, empirical and analytical methods for conducting usability evaluations, and principles for visual, information, interaction, and community design.

Learning Outcomes
- Design a UI through user-centered design
- Conduct a heuristic evaluation or usability evaluation to identify usability issues
- Use principles from visual, interaction, and community design to identify usability issues
- Improve a UI by addressing usability issues through iterative design
- Use modern web technologies to implement a UI

Required Textbooks

Schedule
Lecture titles link to lecture slides.

1. Course Overview and Heuristic Evaluation (1/23)
   Req Readings: none

2. Human Cognition (1/30)
   Req Readings:
   - Norman, Chapter 1: The Psychopathology of Everyday Things
   - Norman, Chapter 2: The Psychology of Everyday Actions
   HWs: HW0 due, Tech Talk signup due

3. User-Centered Design (Recorded Lecture)(2/6)
   Req Reading:
   - Norman, Chapter 6: Design Thinking

4. Contextual Inquiry (2/13)
   Req Reading (distributed as pdf): Hartson & Pyla Chapter 3: Contextual Inquiry: Eliciting Work Activity
   HWs: HW1 due

5. Sketching and Prototyping (2/20)
   Req Reading (distributed as pdf): Buxton, Sketching User Experiences
   HWs: HW2 due

6. Think-aloud Usability Evaluations (2/27)
Req Reading: Krug, Chapter 9, Usability Testing on 10 cents a Day
HWs: HW3 due

7. Midterm Exam (3/6)

(3/13) – NO CLASS – SPRING BREAK

8. Site Design (3/20)

Req Readings:
- Krug, Chapter 6, Street Signs and Breadcrumbs
- Krug, Chapter 7, The Big Bang Theory of Web Design

9. Interaction Techniques (3/27)

Req Readings:
- Krug, Chapter 10, Mobile: It’s not just a city in Alabama anymore
- Krug, Chapter 11, Usability as common courtest
- Krug, Chapter 12, Accessibility and you

HWs: HW4 due

10. Preventing Error (4/3)

Req Reading:
- Norman, Chapter 5, To Err is Human

HWs: HW5 due

11. Visual Design (4/10)

Req Reading (distributed as pdf): Mullet and Sano, Chapter 4, Designing Visual Interfaces

12. Information Visualization (4/17)

Req Reading (distributed as pdf): Card, Mackinlay, and Shneiderman, Chapter 1, Information Visualization
HWs: HW6 Due

13. Community Design (4/24)

Req Reading:
- (distributed as pdf): Kraut and Resnick, Chapter 2, Encouraging Contribution to Online Communities

HWs: HW7 Due

14. Review and Project Presentations (5/1)

Req Reading: none

Final Exam: Tuesday, 5/15, 4:30-7:15pm

Course Policies

Contacting

If you have a general question about an assignment or course content, first check piazza to see if someone has already answered your question. If not, post your question in piazza, where your question may be answered by other students or the course staff. For questions about grades, contact one of the TAs by email.

Office Hours

Office hours are times that we commit to being in our office, door open, first come, first served. You do not need an appointment, and no appointments are accepted. If you cannot make the scheduled office hours, then we can try to set up an appointment. Please note that I am seldom available after 5:00 pm. We will inform you in class or on the discussion board if we have to miss office hours.

Readings

We will have readings from the textbooks Krug and Norman. Additionally, several readings will be chapters from other books, which will be available electronically through Blackboard. All readings are listed in the course schedule. Material covered in the readings may appear in the midterm and final exams.

Resources
This course will use Piazza for posting the schedule and all assignments and announcements. Additionally, we will use Piazza for a discussion board. Information for accessing our class will be provided on the first day of class.

Grades will be available through Blackboard.

**Exams**

There will be a midterm exam and a comprehensive final exam which will be closed-book in-class. Exams will cover material from the lectures and assigned readings.

**Makeups**

Unless arrangements are worked out in advance, missed tests **cannot** be made up. As many of the HW assignments involve peer evaluations where groups give and receive feedback with other groups, late HW submissions impact not only the groups themselves but other students in the course. Thus, 10% will be deducted for late HW assignments and late HW assignments will only be accepted for 24 hours after the due date. **HW assignments submitted more than 24 hours late will receive a zero.** If you’re worried about being busy around the time of a HW submission, please plan ahead and get started early.

**HWs**

The homeworks in the course will be in the form of a project. You will first design and implement a simple UI in the form of a web app. Throughout the semester, you will perform peer evaluations, identifying usability issues with the UI of apps built by other students in the course. Based on the reported usability issues you receive, you will then iteratively redesign and improve the usability of your web app to address these issues. Full details for each HW can be found in the HW Assignment descriptions; the due dates are summarized in the course schedule.

You are allowed to work on the HWs collaboratively using one of two models:

1. Work on and submit all HWs independently.
2. Collaborate from start to finish on all HWs with at most two other students in SWE 632. You must submit one solution as a group for each HW. Additionally, each group member will separately submit a peer evaluation, describing the involvement of each group member (including themselves) in the HW assignment.

**Note:** You are **NOT ALLOWED** to include “guest names.” Every person listed as a collaborator must contribute. If someone is listed as a collaborator but did not contribute, all will be given a zero on the assignment and reported to the university honor committee.

**Tech Talks**

Each student will be responsible for giving a short group presentation surveying a front-end web technology. Each group will consist of 2 students. See the Tech Talks posting on piazza for more details.

**SWE Subject Pool**

To gain experience in user studies, you will participate in the software engineering subject pool and sign up for at least 6 hours of programming user studies or complete an alternative assignment. See the SWE Subject Pool posting on piazza for more details.

**Grading**

- SWE Subject Pool participation: 10%
- Tech talk: 5%
- HWs and project presentation: 40%
- Mid-term exam: 20%
- Final exam: 25%

**Honor Code**

GMU is an Honor Code university; please see the Office for Academic Integrity (http://oai.gmu.edu/the-mason-honor-code-2/) for a full description of the code and the honor committee process, and the Computer Science Department’s Honor Code Policies (http://cs.gmu.edu/resources/honor-code/) regarding programming assignments. The principle of academic integrity is taken very seriously and violations are treated gravely. What does academic integrity mean in this course? Essentially this: when you are responsible for a task, you will perform that task. When you rely on someone else's work in an aspect of the performance of that task, you will give full credit in the proper, accepted form. Another aspect of academic integrity is the free play of ideas. Vigorous discussion and debate are encouraged in this course, with the firm expectation that all aspects of the class will be conducted with civility and respect for differing ideas, perspectives, and traditions. When in doubt (of any kind) please ask for guidance and clarification.

**Accommodations for Disabilities**

If you have a documented learning disability or other condition that may affect academic performance you should: 1) make sure this documentation is on file with the Office for Disability Services (http://ds.gmu.edu/) to determine the accommodations you need; and 2) talk with me to discuss your accommodation needs.

**Privacy**
Students must use their MasonLIVE email account to receive important University information, including messages related to this class. See MasonLive (http://masonlive.gmu.edu) for more information.
