George Mason University
The Volgenau School of Engineering
Department of Computer Science

CS 580 Introduction to Artificial Intelligence

Meeting time: Thursday 4:30 pm – 7:10 pm
Meeting location: Art and Design Building L008

Instructor: Dr. Gheorghe Tecuci, Professor of Computer Science
Office hours: Thursday 7:20 pm – 8:10 pm
Office: Nguyen Engineering Building, Room 4613
Phone: 703 993 1722
E-mail: tecuci at gmu dot edu

Graduate Teaching Assistant: Srivalli Avadhanula, Ph.D. Student
E-mail: savadhan at masonlive dot gmu dot edu
Office hours: 4:30 pm – 5:30pm
Office: Nguyen Engineering Building, Room 4456

Course Description
Artificial Intelligence is the Science and Engineering domain which is concerned with the theory and practice of developing systems that exhibit the characteristics we associate with intelligence in human behavior, such as reasoning, planning and problem solving, learning and adaptation, natural language processing, and perception. This course presents the basic principles and the major methods of Artificial Intelligence, preparing the students to build complex systems incorporating capabilities for intelligent processing of information. Covered topics include: heuristic search and game playing, knowledge representation, logic and probabilistic reasoning, machine learning, instructable cognitive agents, and Common LISP. The students will also learn about the Disciple/Cogent agent development environment created in the Learning Agents Center of George Mason University, as well as other artificial intelligence tools, such as the Weka machine learning workbench, and the SPARQL endpoints for the semantic web. Students will have accounts on Blackboard and can download the lecture notes by going to courses.gmu.edu and logging in using their Mason ID and passwords.

Course Topics
- Overview of Artificial Intelligence and Intelligent Agents
- Problem Solving through Search
- Knowledge Representation and Reasoning in Logic
- Common LISP
- Ontologies and the Semantic Web
- Probabilistic Reasoning and Learning
- Machine Learning
- Instructable Cognitive Agents
Outcomes

- A knowledge of basic uninformed and heuristic search techniques.
- A knowledge of basic logic or probabilistic reasoning techniques.
- A knowledge of basic machine learning techniques.
- An ability to implement basic AI methods in Lisp or in Prolog.
- An ability to identify and apply an appropriate AI method to a given problem.

Grading Policy
There will be several homework assignments, a mid-term exams and a final exam.
The course grade will be determined as follows:
- Assignments: 30%
- Mid-term exam: 30%
- Final exam: 40%

Exam Dates

- Mid-term exam: 03/19/2020, starting at 4:30pm
- Final exam: 05/07/2020, starting at 4:30pm

Assignments Deadline Policy
Assignments are due before the beginning of the class.
No late assignments will be accepted because their solution will be discussed in class the day they are due.

Honor Code Policy
Mason is an Honor Code university. You are expected to abide by the University's honor code (http://oai.gmu.edu/mason-honor-code/), as well as the CS department Honor Code (http://cs.gmu.edu/resources/honor-code/). Any collaboration between students on assignments or exams is unacceptable. We reserve the right to use MOSS (http://theory.stanford.edu/~aiken/moss/) to detect plagiarism in the programming assignments.

Required Reading
- Tecuci G., Lecture Notes in Artificial Intelligence, 2020 (available on Blackboard)

Recommended Readings
The third edition is on reserve for CS580 at the Johnson Center Library, and may be borrowed for 2 hours. To borrow it, you will need to provide its title and call number, as follows: Artificial Intelligence, 3rd ed., Q335.R86 2010
Other Useful Readings

Email Communication

- Please use your Mason email and include CS580 in the subject of any message you are emailing to Dr. Tecuci.
- Please try to limit the size of the files you are emailing.

Mason Email Accounts
Students must activate their Mason email accounts to receive important University information, including messages related to this class.

Office of Disability Services
If you are a student with a disability and you need academic accommodations, please see Dr. Tecuci and contact the Office of Disability Services (ODS) at 993-2474. All academic accommodations must be arranged through the ODS (http://ds.gmu.edu/).
Other Useful Campus Resources
