Course Description

This course is intended to help students learn to think in the manner necessary to fully grasp the nature and power of the digital world around us. The early era of the Internet and the personal computer led to the need for "computer literacy." Now the changing nature of our global society requires that students learn new ways to think about problems and how to solve them, regardless of students' specific fields of endeavor. Through this course, students will explore major issues related to the "big ideas" of computational thinking (namely, Creativity, Abstraction, Data, Algorithms, Programming, Internet, and Societal Impact), as well as how these issues will impact their future lives. (3 credits).

Student Learning Outcomes (LO)

Upon completing the course, the student will be able to:

1. Students will be able to use technology to locate, access, evaluate, and use information, and appropriately cite resources from digital/electronic media.
2. Students will understand the core IT concepts in a range of current and emerging technologies and learn to apply appropriate technologies to a range of tasks.
3. Students will understand many of the key ethical, legal, and social issues related to information technology and how to interpret and comply with ethical principles, laws, regulations, and institutional policies.
4. Students will understand the essential issues related to information security, how to take precautions and use techniques and tools to defend against computer crimes.
5. Students will recognize the significance of the "big ideas" of computational thinking.

Topics

- Representation of ideas with bits
- Basic Boolean logic
- Logic functions
- Programming languages
- Primitive operations
- Algorithms
- Communication between machines
- Computing security concepts
- Basic data analysis
- Impact of automation and communication on human societies
- Human and machine intelligence
Course Prerequisites/Co-requisites

None

Technical Competencies

Basic Blackboard knowledge is assumed.

Textbooks for the class (All Free)

- **Optional**: Wentworth, Elkner, Allen, and Meyers, *How to Think Like a Computer Scientist: Learning with Python 3*; (available free online at [http://openbookproject.net/thinkcs/python/english3e/](http://openbookproject.net/thinkcs/python/english3e/))

Note: You have to login to GMU CAS to access the book when you are off-campus.

Required Materials/Software/Hardware

- Computer with Internet Connection
- Word (or Similar)
- PDF reader
- Blackboard
- Piazza – for announcements, discussions, TA assistance
- Visual Studio Code [https://visualstudio.microsoft.com/vs/](https://visualstudio.microsoft.com/vs/)
- Python [https://www.python.org/](https://www.python.org/)

Course Grading, Examinations, & Grades Composition

Your final grade is based on the following scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>(&gt;= 98.0%)</td>
</tr>
<tr>
<td>A</td>
<td>(&gt;= 92.0%)</td>
</tr>
<tr>
<td>A-</td>
<td>(&gt;= 90.0%)</td>
</tr>
<tr>
<td>B+</td>
<td>(&gt;= 88.0%)</td>
</tr>
<tr>
<td>B</td>
<td>(&gt;= 82.0%)</td>
</tr>
<tr>
<td>B-</td>
<td>(&gt;= 80.0%)</td>
</tr>
<tr>
<td>C+</td>
<td>(&gt;= 78.0%)</td>
</tr>
<tr>
<td>C</td>
<td>(&gt;= 72.0%)</td>
</tr>
<tr>
<td>C-</td>
<td>(&gt;= 70.0%)</td>
</tr>
<tr>
<td>D</td>
<td>(&gt;= 60.0%)</td>
</tr>
<tr>
<td>F</td>
<td>(&lt; 60.0%)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Assignments</th>
<th>Weight</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework</td>
<td>30%</td>
<td>1 lowest dropped</td>
</tr>
<tr>
<td>Quizzes</td>
<td>20%</td>
<td>1 lowest dropped</td>
</tr>
<tr>
<td>Midterm</td>
<td>20%</td>
<td></td>
</tr>
<tr>
<td>Final Exam</td>
<td>30%</td>
<td>*See replacement policy</td>
</tr>
</tbody>
</table>

| **Total**: 100% |
Your Homework is due electronically (via Blackboard) on the date as assigned by your instructor. You may resubmit as many times as you like up until the deadline. But only the most recent upload is graded.

For grade disputes about homework please contact the grader (GTA) first. You must initiate a dispute not later than 3 days after the grade has been published on Blackboard for the dispute to be considered.

Late work is penalized -10% per day late, up to a maximum of 4 days. Thus, an assignment submitted 2 days late which would have scored as 100 would instead receive 80.

An assignment which is more than 4 days late will not be accepted. (link for submission is no longer available after 4 days due)

A missed exam or quiz will result in a zero.

Please contact the instructor as soon as possible (no later than 3 natural days) if there are extenuating circumstances which affect your ability to complete an assignment or exam.

Replacement policy: If you do better in the Final Exam than in the Midterm Exam, your Midterm grade is replaced by the Final Exam grade.

Email Communication/Class Recordings/Class Materials Policies

Students must use their MasonLive email account to receive important University information, including communications related to this class. I will not respond to messages sent from or send messages to a non-Mason email address. I expect all email to be written in a professional manner, please indicate your name and subject you are referring to in your email.

Please give 48 hours (usually 24 hours) to respond to email on working days. Emails sent on the weekend will be responded to on the following Monday or Tuesday.

The use of computers is required in this class. During class, you will only be permitted to work on material related to the class. Engaging in activities not related to the course (e.g., gaming, email, chat, etc.) during our meetings could result in a significant lack of basic knowledge to be successful in this course.

Activities and assignments in this course will use the Blackboard learning system, available at https://mymason.gmu.edu. Students are required to have regular, reliable access to a computer with an updated operating system (recommended: Windows 10 or Mac OSX 10.13 or higher) and a stable broadband Internet connection (cable modem, DSL, satellite broadband, etc., with a consistent 1.5 Mbps [megabits per second] download speed or higher.

All course materials posted to Blackboard are private to this class; by federal law, any materials that identify specific students (via their name, voice, or image) must not be shared with anyone not enrolled in this class.

- Video recordings — whether made by instructors or students — of class meetings that include audio, visual, or textual information from other students are private and must not be shared outside the class.
- Live video conference meetings (e.g. Collaborate or Zoom) that include audio, textual, or visual information from other students must be viewed privately and not shared with others in your household or recorded and shared outside the class.
- Some of our lectures in this class will be recorded to provide necessary information for students in this class. Recordings will be stored on Blackboard and will only be accessible to students taking this course during this semester.

Sharing of instructor-created materials, particularly materials relevant to assignments or exams, to public online “study” sites is considered a violation of Mason’s Honor Code. For more information, see the Office of Academic Integrity’s summary of information about online study sites.
Honor Code

All students are expected to abide by the GMU Honor Code (http://oai.gmu.edu/mason-honor-code/) and the CS Department's Honor Code (http://cs.gmu.edu/resources/honor-code/) policies. This policy is rigorously enforced. All class-related assignments are considered individual efforts unless explicitly expressed otherwise (in writing). Review the university and department honor code and present any questions regarding the policies to instructor. Cheating on any assignment will be prosecuted and result in a notification of the Honor Committee as outlined in the GMU Honor Code. Cheating by copying is often remarkably easy to detect by electronic means, so please do not put yourself at risk by cheating.

To provide an example of what cannot be done, the following are considered cheating and are not permitted:

- Directly using another student's solution to a problem, even if it is from a different semester.
- Asking a friend for a solution or paying someone for a solution.
- Searching for a solution in an outside source such as the Internet or a solution manual.
- Pasting your solutions to a public or semi-public site, including the message forum for this course (except in a private posts to the TAs).
- Collaborating or copying during exams.
- Assisting others in any of the above.

By contrast, the following is considered fair game during this course:

- Discussing the homework with other students in the class via informal, non-specific approaches to how a problem can be solved (do not share code, however).
- Getting help from classmates in solving a specific type of bug in a program (as long as it doesn't lead to discussing how the code should be structured).
- Searching on the Internet for alternate explanations of concepts discussed in class.

When learning to program, the ability to discuss with others is important to gain a footing and to better understand what is going on. At the same time, solving problems individually helps us better prepare for situations in which there are no other resources to rely on (like exams). If you are unsure whether something is fair game or cheating, ask an instructor.

University Policies

Beginning Fall 2018, there is a limit of two graded attempts for this course. A W does not count as a graded attempt. Please see the University Catalog and consult with your academic advisor if you have any questions.

Disability Services at George Mason University is committed to providing equitable access to learning opportunities for all students by upholding the laws that ensure equal treatment of people with disabilities. If you are seeking accommodations for this class, please first visit http://ds.gmu.edu/ for detailed information about the Disability Services registration process. Then please discuss your approved accommodations with me. Disability Services is located in Student Union Building I (SUB I), Suite 2500. Email: ods@gmu.edu | Phone: (703) 993-2474.

George Mason University, an intentionally inclusive community, promotes and maintains an equitable and just work and learning environment. We welcome and value individuals and their differences including race, economic status, gender expression and identity, sex, sexual orientation, ethnicity, national origin, first language, religion, age, and disability. As a member of the George Mason University community, the Computer Science department plays an integral role in building an educational environment that is committed to anti-racism and inclusive excellence. For more information on how to continuously cultivate the practice of anti-racism, see this guide from the National Museum of African American History and Culture on how to be anti-racist: https://nmaahc.si.edu/learn/talking-about-race/topics/being-antiracist.
Gender Identity and Pronoun use: If you wish, please share your name and gender pronouns with me and how best to address you in class and via email. I use she/her for myself and you may address me as Professor Tymann in email and verbally. You can update your chosen name and pronouns here: change name and pronouns on Mason records.

Title IX: As a faculty member and designated “Responsible Employee,” I am required to report all disclosures of sexual assault, interpersonal violence, and stalking to Mason’s Title IX Coordinator per university policy 1412. If you wish to speak with someone confidentially, please contact the Student Support and Advocacy Center (703-380-1434) or Counseling and Psychological Services (703-993-2380). You may also seek assistance from Mason’s Title IX Coordinator (703-993-8730; titleix@gmu.edu).

Student Support Resources on Campus: https://stearnscenter.gmu.edu/knowledge-center/knowning-mason-students/student-support-resources-on-campus/.

Incomplete Grades: https://chssundergrad.gmu.edu/other-forms/incompletes.

Campus Closure due to Weather: If the campus closes or class is canceled due to weather or other concern, students should check Blackboard for updates on how to continue learning and information about any changes to events or assignments. (FYI: if campus is closed due to weather on a scheduled lecture day, we will still meet in Zoom as scheduled, since we are not traveling to attend lecture).

Safe Return to Campus Statement: All students taking courses with a face-to-face component are required to take Safe Return to Campus Training prior to visiting campus. Training is available in Blackboard (https://mymason.gmu.edu). Students are required to follow the university’s public health and safety precautions and procedures outlined on the university Safe Return to Campus webpage (www2.gmu.edu/safe-return-plan). Similarly, all students in face to face and hybrid courses must also complete the Mason COVID Health Check daily, seven days a week. Only students who receive a “green” notification are permitted to attend courses with a face-to-face component. If you suspect that you are sick or have been directed to self-isolate, please quarantine or get testing. Faculty are allowed to ask you to show them that you have received a Green email and are thereby permitted to be in class.

Classroom Expectations
- You are expected to treat the faculty and each other respectfully.
- You are expected to come to class on time and stay the full class period.
- You are expected to review each homework at the time it is posted and start working on it as soon as possible. Do not wait until the weekend to start reading an assignment, since it will be difficult to solve all the doubts. It should be noted that not being able to turn in homeworks on time due to procrastination can significantly affect your grade due to a lack of organization of your time.
- Homeworks must be submitted using Blackboard. *Emailed homeworks will not be graded.*
- Students must verify that the correct homework has been submitted by the due date and is not a corrupted file. Blank copies, unreadable files, or incorrect files submitted will automatically receive a grade of zero and no re-submissions are accepted.
- Submissions of homeworks with the wrong file name or format, etc. will be penalized. Please verify that these points are met in each submission.
- No make-up for an exam, quiz or homework are accepted, except for documented mitigating circumstances. Example of a mitigating circumstance is death in immediate family, or student’s illness as verified by a physician.
- Your GTA will grade your homeworks and give you feedback within 7 days of the due date.
- Your grade is NOT based on how hard you work but based on how you have mastered the material.
- Quizzes are graded automatically by Blackboard.
- Please keep in communication when things are getting rough - if you or people you take care of at home are ill and need all your attention; if you are facing evictions or problems that will impact your ability to participate in class and do the assignment work. We can strategize and think it through far better ahead of time than afterwards, for sure. We can affect the future far more effectively than the past! We can't undo actions taken and time spent, but we can affect the future.
