Course Description
This course covers fundamental knowledge of database management, emphasizing the design, implementation, and utilization of relational database systems. Students will experience the complete database creative process, including database design, construction, and programming. Formal theories of database design and normalization will be presented, along with an introduction of NoSQL databases.

Class Time & Location
M 10:30 AM - 1:10 PM Arlington: Van Metre Hall 111

Textbook
Required:
- Fundamentals of Database System (7th Edition) by Ramez Elmasri and Shamkant B. Navathe
Recommended:
- Oracle 10g Programming: A Primer by Sunderraman
- NoSQL Distilled: A Brief Guide to the Emerging World of Polyglot Persistence by Sadalage and Fowler

Instructor
Dr. Ping Deng
E-mail: pideng@gmu.edu
Office hours: TR 3-4 PM @ ENGR 4608 or by appointment

Prerequisites
(CS 310 or INFS 519) and CS 330

Disability Accommodations
If you are a student with a disability and you need academic accommodations, please contact the Office of Disability Services (ODS) at 703-993-2474 or visit http://ods.gmu.edu. Additionally, please inform me at the beginning of the semester. All academic accommodations must be arranged through the ODS. Please ensure that you proactively request the use of your accommodations well in advance of exam/quiz dates and project deadlines.
Honor Code Statement
Please be familiar with the GMU Honor Code. In addition, the CS department has its own Honor Code policies. Any deviation from this is considered an Honor Code violation. All graded work must be your own effort. AI is viewed as a tool to aid in your learning process, rather than a means to complete assignments and thereby replace your opportunity for learning. Any attempts at cheating will not be tolerated, and will be turned in to the Honor Committee with significant penalty recommended. The usual recommendation is grade F for the course.

Grading Weights
Quizzes: 15%
Projects: 35%
Midterm: 25%
Final exam: 25%

Grading Policy
• All projects must be submitted on Blackboard.
• You have a budget of 3 late days which you can use for projects. No late work accepted otherwise.
• The lowest quiz score for the semester will be dropped.
• Grades will be changed only when a grading error has been made. All grade change requests are due within a week of the grade becoming available on Blackboard. After that week, the window to contest a grade has closed other than recording errors.
• No exam or quiz make-up will be permitted unless arrangements are made with the instructor at least one day in advance.
• Unexcused absence from the final exam will result in grade F for the course.
• If any extra credit is available, it might be available on specific quiz, exam or assignment, but not as an end-of-semester batch of extra work.

Grading Scale
A+ >98
A  92-98
A-  90-92
B+  88-90
B  82-88
B-  78-82  
C    68-78  
F     <68  

**Tentative Course Outline**
Introduction to database concepts
ER & EER model
Relational data model
ER & EER to relational mapping
Relational algebra
SQL
Midterm exam
Database programming
Functional dependency and normalization
NoSQL
Final exam

**Helpful Comments**
Welcome to CS 450-004/550-005! This class is designed to be highly interactive and optimized for **in-person** learning to enhance the overall learning experience. We will cover a diverse range of materials and introduce numerous new concepts. It’s vital for your success to attend classes regularly, actively engage in group exercises and discussions, review the slides post-lecture, and initiate work on assignments promptly once they are accessible on Blackboard. Best of luck!
