

October Rotation Report*Assigned: 10/16/2013**Due Date: 10/30/2013*

This assignment is to write up an *experience report* of 2-3 pages describing the work you did in your October rotation, its significance, and what you learned from the experience. You will also be expected to give a short (about 5 minutes) oral presentation on your rotation.

The writing assignment is open-ended, because people may have very different types of experiences and results from their projects. However, here are some ideas and references that may be useful. If you have some results to show, take a look at the two-page abstracts from AAMAS, for example at:

<http://www.ifaamas.org/Proceedings/aamas2011/resources/extabstracts.html>

(you don't need things like an abstract / categories / general terms / keywords).

If you don't, you may still want to describe the problem and related work in a similar way. At the end, be sure to include at least a paragraph on what you learned from the experience, and any other thoughts you are interested in sharing.
